I know this must sound insane if you've been listening to NPR- but it's all true. NPR buries the important stories-ATC is an entertainment-marketing program. Realize that every Bush supporter is a good person at heart, they've just been fooled by the media. If we reclaimed our public airwaves, we could show these bush supporters just how badly they've been fooled. They will overcome their embarrassment once they realize how their children's future will be affected if we don't stop this madness. If you care about your grandchildren, organize and reclaim your local public radio station and open up a dialogue in your community.
